

Bromcom Roadmap

A note to start...

This overview reflects our broader vision and ambition for the year ahead, outlining how we aim to continue evolving the Bromcom MIS to deliver meaningful value for schools, multi-academy trusts, and local authorities.

Our roadmap is driven by a clear vision for the future and shaped by close collaboration with our customer community. The feedback, insight, and ideas you share with us play a vital role in guiding our priorities, helping us focus on the areas where we can make the greatest impact. These priorities are continually reviewed to ensure they remain aligned with your needs and aspirations.

We sincerely thank you for your ongoing partnership, trust, and valuable feedback. As we move forward through 2026, we are excited to continue working closely with you and look forward to the journey ahead together.

Please note: This roadmap reflects our current development plans. As we move through testing and refinement, some features or timelines may change.

This section describes how we have shaped the Bromcom Roadmap based on our customers' feedback.

Our Roadmap: Driven by You

At Bromcom, we believe the most valuable ideas come from the people who use our MIS every day. Our roadmap has therefore been shaped by you, through a combination of strategic meetings with key customers and surveys across our wider customer base. This collaborative approach ensures we remain focused on what matters most, enabling us to deliver continuous improvements that help schools, trusts, and local authorities work smarter, not harder, in line with your needs and priorities.

Listening Where It Counts

We stay closely connected to your feedback through the **Bromcom Community** site, the **Ideas Portal**, and our in-person Summit Meetings nationwide. By listening to what matters most to you, we gain valuable insight into what's working, where we can improve, and which ideas will make the biggest difference to your day-to-day experience.

A Living Roadmap, Reviewed Each Term

Our roadmap isn't set in stone, it evolves. With every review we reflect on what we have delivered, check in with our customers, and realign priorities based on the latest needs and insights. That way, we ensure we're not just building great features, but the *right* features.

Shaped by *you.*

What's New

Spring Release Highlights 2026

Spring Release Highlights

Administration

Single Central Record

Interact with the Single Central Record (SCR) to drill down into staff records and apply filters by Staff Type and SCR Data Checks, helping you quickly pinpoint the information you need.

The screenshot shows the 'SCR Overview' interface. At the top, there's a filter for 'Support Staff' and a 'Show Overview' toggle. Below that, a summary bar indicates 28 total support staff, 1 with no issues, and 27 with incomplete records. The main area is divided into two sections: 'SCR Sections' and 'Single Central Record'. The 'SCR Sections' table shows counts for various checks like 'Personal Information', 'Staff', 'Identity Checks', etc. The 'Single Central Record' section shows a search bar and a list of staff members with columns for 'Personal Information', 'Staff', 'Identity Checks', and 'DBS and Barred List Checks'.

Administration

Student Contacts

Improved workflow for creating new Contacts, designed to encourage users to link contacts to students rather than create unlinked or duplicate records.

The screenshot shows a 'Matched Contact(s)' dialog box. It features a yellow warning banner: 'There are already Contact records stored with similar details. Please ensure duplicate records are not created for contacts in your school.' Below the banner is a table with columns: Contact ID, Last Name, First Name, Date Of Birth, Sex, Relationship, Address, and Action. Two contacts are listed: one with ID 2281 (Ricky Brown) and one with ID 883 (Stephen Brown). At the bottom, it says '2 Matched' and includes 'Cancel' and '+ Create New' buttons.

Exams

Exam Seating Plan Report

Display colour-coded Special Candidate Requirements directly within exported Exam Seating Plan Reports for improved visibility and planning.

The screenshot shows an 'Exam Seating Organisation Report' for Room E06 on 12/05/2026. It includes a table with columns for Component Code, Component Name, and Duration. Below this is a seating plan table with columns A through E and rows 1 through 5. The seating plan shows candidates like 'Simon Wilson' and 'Oliver West' with their respective requirements (e.g., 'Blue Paper', 'Blue Paper', 'Blue Paper'). A legend at the bottom explains the color-coding for Special Requirements: Blue (Blue Paper), Green (Green Paper), Yellow (Yellow Paper), etc.

Spring Release Highlights

Seating Plan

Seating Plan Behaviour New UI

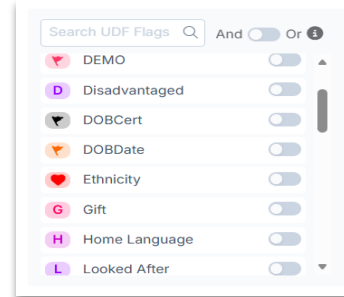

Log behaviour events directly from the Seating Plan within the new UI, including the ability to assign events, points and detentions to one or more students at once.

Seating Plan

Filter By User Defined Flags

Filter students by User Defined Flags in the Seating Plan using this new addition to the toolbar. Multiple filters can be active at the same time and apply to all students.

Vision

Assessment Updates

See assessment data updates in Bromcom Vision almost instantly thanks to this new upgrade. A near-instant sync ensures that Student Assessment, Student Curriculum Assessment and CTF Assessment will show the date and time that the system has updated the information.
